If you are looking for a cookbook keep looking.

By Alys MTB Corbin

This cookbook is nothing more than a glorified version of what you would get with your Turbo Oven or NuWave Oven. I was looking for a cookbook to give more elaborate meals and more creative recipes to take cooking with a Halogen Oven to the next level beyond the basic guide. This book falls short of that goal. I do not feel it was worth the price or the shipping that went along with it. I will keep looking for a better cook book.

I have the halogen oven, though it came with a little recipe book, it is never enough. This is my 2nd oven by the way. The other one was all plastic and I wouldn't recommend that one to anyone. Well about the book, it's the best, I have made a few things in it
