THE INTERIOR PLAN: CONCEPTS AND EXERCISES BY ROBERTO J. RENGEL PDF

This introductory-level text introduces students to the planning of interior environments. Addressing both the contents of interior environments and the process of interior space planning, topics include the making of rooms, the design of effective spatial sequences, functional relationships among project parts, arrangement of furniture, planning effective circulation systems, making spaces accessible, and designing safe environments with efficient emergency egress systems. Numerous exercises throughout the book facilitate learning by encouraging students to apply ideas and concepts immediately after reading about them.

Excellent Interior Design Student Staple

By Elena

Easy to read and understand, lots of illustrations of standard sizes and spacing, even has floor plans and illustrations of important works by Mies Van der Rohe, Josef Hoffmann, Inigo Jones, etc. Informal, sketchy, large illustrations and work-book assignments feel a little childish, but it makes it less intimidating for such a comprehensive text.

1 of 1 people found the following review helpful.

Lots of Commercial Design emphasis

By Sunny Skies

This book was a requirement for my Interior Design course. The concepts were clearly explained and there are multiple drawings. The only thing our class and instructor noted was there is heavy emphasis on commercial spaces design, light on residential design. A lot of the exercises involved retail stores and

restaurants.

4 of 4 people found the following review helpful.

Great book for the Design Process

By robin s.

Perfect for both instructor and students alike! Will use it extensively. The exercises included really hit the concepts that are being explained.
