## About the Author

### Andrea Dalle Vacche

Andrea Dalle Vacche is a highly skilled IT professional with over 14 years of experience in the IT industry and banking. He graduated from Università degli Studi di Ferrara with an information technology certification. This laid the technology foundation that Andrea has built on ever since. Andrea has acquired various industry-respected accreditations, which include Cisco, Oracle, RHCE, ITIL, and of course, Zabbix. Throughout his career, he has worked in many large-scale environments, often in roles that have been very complex, on a consultant basis. This has further enhanced his growing skill set, adding to his practical knowledge base and increasing his appetite for theoretical technical studying. Andrea's love for Zabbix came from his time spent in the Oracle world as a database administrator/developer. His time was spent mainly on reducing ownership costs, specializing in monitoring and automation. This is where he came across Zabbix and the flexibility it offered, both technically and administratively. With this as a launch pad, Andrea was inspired to develop Orabbix, the first open source software to monitor Oracle's complete integration with Zabbix. He has published a number of articles on Zabbix-related software, such as DBforBIX. His projects are publicly available at <http://www.smartmarmot.com>. Currently, Andrea is working as a senior architect for a leading global investment bank in a very diverse and challenging environment. He deals with many aspects of the Unix/Linux platforms as well as many types of third-party software, which are strategically aligned to the bank's technical roadmap. In addition to this title, Andrea Dalle Vacche is a coauthor of *Mastering Zabbix*, Packt Publishing.

### Stefano Kewan Lee

Stefano Kewan Lee is an IT consultant with more than 12 years of experience in system integration, security, and administration. He is a certified Zabbix specialist in large environments holds a Linux administration

certification from the LPI and a GIAC GCFW certification from SANS Institute. When he's not busy breaking websites, he lives in the countryside with his two cats and two dogs and practices martial arts. In addition to this title, Stefano Kewan Lee is a coauthor of *Mastering Zabbix*, Packt Publishing.

This book does a good job of explaining just how Zabbix works and how ...

By Kent Tenney

Zabbix is extremely powerful, extensible and scalable. With this comes complexity. This book does a good job of explaining just how Zabbix works and how to get the most from it. I'd take some exception with the 'Essentials' component of the title, most of the Packt 'Essentials' books are more basic than this. If you're starting from scratch, this may not be the book for you. Recommended.

Book is for an older version - Zabbix 4.2

By Tikken

Book is for an older version (Zabbix 4.2), enough so that I cannot use the code snippets offered. I had hoped to use this book as a walk-thru to get a test environment of Zabbix running, but alas, no. It's more for use as general understanding of how Zabbix works. Also, as the comments say, it's not for the host monitoring, for any agent use is excluded, so it's primarily for snmp and ping and the like.

Great reading !

By Steve

Installation of Zabbix, managing the hosts manually or with the network discovery and see the result in maps.

This book provides all the necessary to monitor your network with SNMP.
